

Cyclone Liner Vac

The new 3.0 hp Cyclone is the most powerful blower/vac on the market today. The Cyclone's powerful 2 stage motor can generate a sealed pressure of water lift and an open flow of 130 cfm. More than enough power to winterize a 9ft deep pool or to suck back a liner on a cold spring day. A completely redesigned plastic housing offers a 4.0 inch inlet with protective filter screen and a standard 1.5 inch threaded outlet to allow for multiple PVC fittings.

Other features include:

- Rugged ABS housing with rubber feet and built in handle.
- 20 amp water resistant on/off switch with 6.0ft grounded power cord.
- Powerful 15.0 amp 120 volt bypass motor with 7.2 diameter fan.

Model 141281002

Size: L x W x H
16" x 10" x 15.5"
Weight: 16lbs

* 4.0" vacuum liner hose sold separately
